

TREASURE HUNTER

Today was a lovely bright and sunny day, perfect weather for treasure hunting! Before our quest, we started on the roof and put on all of our equipment. Everyone looked fantastic with their hats, vests and binoculars. We handed out our treasure maps and were on our way! We bounced our way along to the park, where we searched for buried treasure and pirates gold! Along the way we discovered some seeds that we were told would one day grow into giant trees. Once the park fun was over, we entered the final part of our journey. We made our way into the park behind the Science museum, once inside we found so many fabulous treasures! including magical shell key rings. Everyone gathered round and decided their booty, and me made the short journey home back to Kspace.
