

## Sculpture

Monday December 13th, 2021, 3-4pm

Dear Aspace Sculpture Club parents,

Our project inspired by the sculptor Alberto Giacometti reached a finale today, as we added the final layer — or the so-called overpainting — and finished our figures. Although Giacometti worked mostly in bronze, we decided to use a brighter silver finish. Benefiting from the nice weather this afternoon, we headed up to the roof and used spray paint to carefully apply the final and most important layer, and thus our figurines received their full lustre. We couldn't bring our sculptures home today as they need more time to dry in the chilly winter weather, but we look forward to doing so next week.

Sincerely,  
Teachers Marko and CJ
