

after school @ Kspace  
**Aspace** After School Programmes

# Coding Club

Ages 4 to 7 years old

**4 to 7 year olds**

Thursdays: 4.00pm to 5.00pm

The new year is here and it's time to learn a brand new fun skill for 2020. We are happy to introduce an excellent addition to our Aspace lineup that puts a fun and easy twist on technology with our Coding Club. Coding is everywhere and is a huge part of our lives every single day. From your phone to traffic lights to our own computers in the classroom; our Kspace Coding Club will show young minds the basic steps of how to set up your own system. Using resources like Beebots, Dash robots, Minecraft and micro computer circuitry we will explore coding and programming in the most interesting ways and open new doorways into a shared future.

Over this course we will explore:

Are computers really smart? / Information security The internet: a great resource  
On/off, yes/no, true/false: The binary / Programming Robots / Educational games  
Block-based coding / The Computer's insides - How does it work?
