

# Treasure Hunters

Thursday 20th August

**Treasure Hunters** had an amazing first lesson today with the Kspace kiddies really enjoying dressing up as professional explorers; complete with safari hat, multiple pocket vests (to keep all our found treasure), binoculars and a specimen jar to keep any natural objects we might find. We had a circle time discussion about what merits treasure. We all agreed that objects in nature are fabulous treasures from beautiful flowers and berries to shiny stones and maybe even gold. We then took a trip to the park to see what we could find. The mini explorers were thrilled to be out in nature looking for real life treasure. The children found some real live ants, a bunch of fresh berries, a beautiful fallen red leaf and some flower petals. The humid weather really added to a realistic rainforest atmosphere and once we found enough treasure we headed back to school to compare our finds. What an amazing day! Next week we delve even further into the jungle for more fun finds. Be sure to join us. See you then.
